

## How to export data in the Robust Health app.

1. Users can create a report that is a summary of the information recorded in the app and email it from the app to themselves or someone else.

From the **Menu**, tap **Settings**.

2. Next, select **Export Data**.

3. Tap on the name of the profile the data file will be created for.

4. Select the file type for the data export, the desired date range, and enter the email address of who the report should be sent to. Tap **Send**.

*Note: If you want to add more than 1 email address, tap the **Add+** button.*

5. A **Success!** message indicates the report request has been submitted and the user will be taken back to the **Settings** menu.

## Demo's 6 Month Review

Report date range 9/1/21 - 2/28/22

Thank you for using Robust Health! This report is a summary of the information you've recorded in the app that may be helpful in understanding your condition.

● Bleeds ● Treatments ● PRO Surveys ● Goal Check In

September 2021

October 2021
