# How to view statistics in the Robust Health app.

1. From the **Menu**, tap **Stats.**

   Note: The screenshots contained in this document were taken on an iPhone and may look slightly different on your mobile device.

2. There are 6 different statistic options available to help a user get a complete picture of the patient's health.

3. The **Bleed Frequency** bar graph shows the number of bleeds recorded in the app each month.
   - Tap the "**<**" or "**>**" arrows next to the year to see information from a different year.
   - Tap on the bar graph to show the total number of bleeds for that month.

4. The **Treatment Frequency** bar graph report shows the total amount taken per treatment each month.
   - Tap **Treatment Name** to change between treatments.
   - Tap the "**<**" or "**>**" arrows next to the year to see information from a different year.
   - Tap on the bar graph to show the total dosing amount for that month.

5. The **Bleed Location** table shows the location of the bleed and the total number of times a bleed happened in that location during the year.
   - Tap the "**<**" or "**>**" arrows next to the year to see information from a different year.

6. The **Reason for Treatment** graph shows the percentage for why a treatment was given and how many times it happened during the year.
   - Tap the "**<**" or "**>**" arrows next to the year to see information from a different year.

7. The **Bleed Related Absence** bar graph shows the number of days missed for school or work as reported with bleed events.
   - Tap the "**<**" or "**>**" arrows next to the year to see information from a different year.
   - Tap on the bar graph to show the total number bleed related absences for that month.

8. The **Bleed Cause** graph shows the percentage of bleeds recorded based on the cause of the bleed and how many times it happened during the year.
   - Tap the "**<**" or "**>**" arrows next to the year to see information from a different year.
